International trends, roles and stakes regarding scientific and societal impact

AESIS

NETWORK FOR
ADVANCING & EVALUATING THE SOCIETAL IMPACT OF SCIENCE

NOVO
NORDISK
FONDEN
Benefiting people and society

Understanding the current state and influence of science from different regions in the world can be of great importance. What are the developments and expected outcomes of shifts in share-proportions highly-cited articles, multi-language inclusion and internationalisation, and how does this relate to societal impact.

Webinar Programme

16.00 Words of welcome

Anika Duut van Goor Director of AESIS, The Netherlands

16.05 Individual presentations by invited speakers

Internationalisation and its impact on science and societal outcomes

Olumide Odeyemi
Research Integrity Coordinator

Sub-topics:

- Global interconnectivity leading to cross-border societal problems
- Enhancing the societal impact of diverse research through cross-border collaborations
- Challenges in cross-border collaborations

Dr. **Olumide Odeyemi** is a multi-skilled research support specialist and researcher with extensive experience supporting research grant applications submitted to various national and international funding schemes, and funding bodies. His specialties include researcher development, research impact and engagement, working with industry, research grants development, costing and pricing research projects, and identifying funding opportunities. He is a recipient of multi-internationally competitive scholarships, grants and awards valued at over \$250,000. As a research support specialist, he has provided research support services towards over 250 grant applications budgeted at over \$300 million research funding grants submitted to over 150 funding bodies.

Challenges to science and societal impact

Heidi van Rooyen is the Group Executive of the Impact Centre at the Human Sciences Research Council in South Africa and is currently the acting Deputy CEO for Research. Her 28-year professional career spans government, higher education, and the science council environments. Heidi is a social scientist and clinical psychologist holding an honorary professorship from the University of the Witwatersrand, a member of the Academy of Science of South Africa and its Standing Committee on Health, and one of a few social-behavioral scientists appointed to the Revised Ministerial Advisory Committee to advise the South African Government on Covid-19.

Heidi van Rooyen
*Group Executive of the Impact Center,
HSRC, South Africa*

Sub-topics:

- Investigating the barriers and obstacles hindering the translation of scientific research into societal impact
- Addressing challenges related to communication, accessibility, and knowledge transfer between researchers and the public

The Potential of Preprint, Review and Curate Models for Accelerated Impact

Johan Rooryck
*Executive Director of cOAlition S,
Professor of Linguistics, Leiden
University*

Sub-topics:

- Faster access to research for greater impact and challenges that come with
- Possibilities of preprint review: Preprint Review Curate models
- Expectations for the future

Johan Rooryck is Executive Director of *cOAlition S* and a professor of linguistics at Leiden University. He is the editor-in-chief of the Fair Open Access journal *Glossa: a journal of general linguistics* since 2016. From 1999 to 2015, he was the executive editor of *Lingua* (Elsevier), when its Editorial Team and Board, as well as its reader and author community, decided to leave *Lingua* to found *Glossa*. He also is a founding member and president of the *Fair Open Access Alliance* (FOAA) and *Linguistics in Open Access* (LingOA). He is a Member of the *Academia Europaea*.

16.50 Debate and Q&A
